

BETA 96BP-HO/SC9

Set of 9 ball head offset hexagon key wrenches, with screw holding system

Certifications and Standards

0

Features

Set of 9 offset hexagon key wrenches with a ball head, with screw holding system.

MAXIMUM GRIP ON SCREW

The screw holding system is designed to optimise the grip of the tool, ensuring a constant grip of the screw during all phases of the work.

TRANSPORTABILITY AND REPOSITIONING

The rigid support allows the wrenches to be stored and transported quickly and safely.

MANOEUVRABILITY

The length of the wrench allows for greater manoeuvrability. In addition, the ball head positioned on the long side allows the tool to be used at different angles.

SCREW RETENTION SYSTEM

The screw holding system allows the safe removal and repositioning of hexagonal profile screws.

ERGONOMIC SUPPORT

The support facilitates tool removal and allows immediate identification by clearly visible size markings.
