Cable length: 1.5 m

Compatibility: Windows XP, Vista, Win 7 / 8 / 10 / 11, Linux, macOS, Android

Package content: Membrane keyboard with USB-A cable, manual

Dominate the battlefield with the GALAXIS membrane keyboard. It offers multicolor RGB backlighting that adds a modern touch to your setup and facilitates key navigation. A key feature of the device is Key Rollover technology (up to 19 keys) supported by an Anti-ghosting system. This guarantees full control over every move—even complex combinations are registered without delay. At the heart of the keyboard are quiet membrane switches with a lifespan of 10 million clicks. The functionality is rounded out by 4 dedicated multimedia keys, allowing you to manage audio without interrupting the action.
