AS1700 (1070)
1 Part neutral thixotropic adhesive sealant

Introduction
AS1700 is a specially formulated neutral cure silicone sealant designed for use with sensitive electronic assemblies. It is described as an alkoxy 1-part room temperature vulcanising (RTV) silicone sealant. The Alkoxy cure system produces a silicone sealant with excellent adhesion to most common substrates.

Key Features
- Non corrosive
- Excellent primerless adhesion to many substrates
- Excellent dielectric properties
- Low odour

Use and Cure Information

Typical Applications
- Assembly of electrical and electronic equipment
- Sealing of corrosion sensitive devices
- Shallow encapsulation of small circuits and connectors

Application and Cure

After removal of the package seal the product is ready for use. It can be applied manually or using a pneumatic caulking gun. Following exposure to atmospheric moisture the product begins to cure to a resilient, durable silicone elastomer. Cure time will depend on the relative humidity and ambient temperature. At 20 to 30°C and 40 to 70% Relative Humidity a 3mm section will normally cure in less than 24 hours. The volatile by-products of the curing mechanism are relatively inoffensive alcohols. (See Health and Safety Data)

Cure time depends on the thickness of sealant applied and the area exposed to the atmosphere. It is recommended that a minimum thickness of 1 mm is achieved between parts to obtain best adhesion to substrates.

Customers are advised to carry out their own tests on clean, degreased substrates to ensure satisfactory adhesion is achieved. All values are typical and should not be accepted as a specification.

Health and Safety – Material Safety Data Sheets available on request.

Packages – 75 ml and 310 ml cartridges, 20 kg and 200 kg bulk containers.

Storage and Shelf Life – Expected to be 12 months in original, unopened containers below 40 °C.
