

BETA 1741TR

Riveting pliers with rotating head, supplied with 4 interchangeable nozzles

Features

Riveting pliers with rotating head

WORK OPTIMISATION

This riveting pliers, designed to optimise efficiency and operator comfort, minimises the effort required and maximises productivity. Thanks to its rotating head, using the tool is less tiring, ensuring a highly efficient working experience.

TRANSPORTABILITY

Thanks to its small size and low weight it fits perfectly into any work bag ensuring easy transportation and uncompromising productivity.

VERSATILITY

Particularly useful for applications requiring fast and safe mechanical fasteners, such as in the automotive industry, in machine construction, or in body work.

REVOLVING HEAD

Capable of 360° rotation, it allows different angles and positions to be reached without repositioning.

INTERCHANGEABLE NOZZLES

Interchangeable nozzles M3, M4, M5 and M6 mounted on the body to allow the user to select the most suitable according to the application.

SPANNER

Locking spanner included and can be inserted in the space provided inside the handle to have it available at all times.
