

BETA 7563N

Grid microfleece sweater, short-zipped, black

Features

Optimal warmth, lightness and breathability: the Grid Fleece retains heat, aids moisture wicking and ensures superior comfort without compromising freedom of movement

THERMAL INSULATION AND BREATHABILITY

The grid structure of the grid fleece fabric retains heat without weighing it down and, at the same time, promotes ventilation, allowing moisture to evaporate quickly

LIGHTNESS AND COMFORT

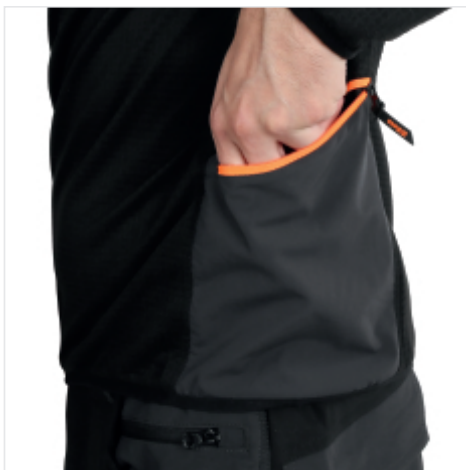

Thanks to its grid structure, Grid Fleece fabric is lighter than other fleece materials, offering greater freedom of movement and reduced bulk.

VERSATILITY

Ideal as a mid-layer under a waterproof or windproof shell, or as an outer layer in milder weather.

COMPLETE, COORDINATED LOOK

The 7563N microfleece is perfect for combining with the other garments in the TOP LINE line, creating a complete and professional work outfit without sacrificing comfort and style.

SIDE POCKETS

Designed for maximum functionality, the zippered side pocket offers convenient space for small items.

CUSTOMISED LYCRA

Lycra cuffs and waist provide a snug fit, improving comfort, cold protection and wear resistance.

GRID FLEECE FABRIC

The Grid Fleece has a soft interior that offers a pleasant feeling of warmth, while the knitted exterior makes it easy to combine with a superior garment.

Size

IT 46 - 58
UK XS - 3XL
