

UEM100 (UEM100-A R, UEM100-A M)

100A three phase energy meter with built-in communication

- UEM100-A R with RS485 Modbus RTU communication
- UEM100-A M with M-Bus communication
- Direct connection up to 100 A per phase
- Fully bi-directional 4-quadrant measurements for all energies and powers
- For 2/3/4 wire networks with balanced or unbalanced load both models RS485 & M-Bus
- 2 SO outputs
 - S01 is fully programmable by HMI or at a distance by COM
 - S02 is always fixed to 400 imp/kWh
- Up to 4 tariffs
- Class B according to EN 50470-3 (MID)
- Certified for maximum operating temperature of 70°C

» General features

4 DIN modules energy meter for the energy measurement in industrial and civilian application, with the following built-in communications according to the model: RS485 Modbus RTU or M-Bus.

The device comes with MID Certification, making it suitable for billing purposes.

The active energy is compliant to EN 50470-3 class B (MID).

The reactive energy is compliant to IEC/EN 62053-23 class 2.

Besides the energy, the meter can measure the main electrical parameters and makes them available on the built-in COM port. The LCD display shows the energies and the instantaneous powers. The COM port allows to manage the connected meter by a remote station. Data is transmitted on a RS485 or M-Bus or line according to the device model. Moreover, a dedicated application for remote management is provided:

- *Modbus Master software* > for energy meter management by PC in RS485 Modbus network.
- *M-Bus Master software* > for energy meter management by PC in M-Bus network.

Wide backlighted LCD display with clear graphic symbols comprehensible at a glance.

Metrological LED on front panel and sealable terminal covers. The analysis of the MTBF values, the accurate selection of components and the reduction of the internal working temperatures together with strict production and control standards guarantee a product with an excellent quality and a long lasting reliability.

» Applications

- Totalization of the electric energy in the industry for each single line or machine.
- Measurement of energy generated by renewable sources such as solar, eolic, etc.
- Accounting and billing of consumptions in camp sites, malls, residential areas, naval ports, etc.
- Totalization of the electric consumption in hotels, congress centers, exhibition fairs.
- Accounting of the consumptions in buildings with executive office services.
- Allocation of the consumptions in civilian and industrial buildings.
- Realization of energy monitoring systems.
- Remote survey of the consumptions and compute of the costs.

» Benefits

- Remote management through optional application/interface according to the device model (RS485 Modbus and M-Bus).
- Up to 50 instantaneous measurements, complete set of real time values, total counters, tariff counters and partial counters.
- Direct connection up to 100 A per phase.
- MID certified.
- Operating temperature up to 70°C.

» Technical features

GENERAL

Housing in compliance with	DIN 43880
----------------------------	-----------

POWER SUPPLY & WIRING

Power supply	from the voltage
Range	nominal voltage $\pm 20\%$
Max consumption	UEMCT-A R: 1 W, 2 VA UEMCT-A M: 1 W, 3 VA
Wiring modes	3 phases/ 4 wires/ 3 currents, 3 phases/ 3 wires/ 2 currents, 1 phase/ 2 wires/ 1 current

NOMINAL VOLTAGE AND FREQUENCY

Nominal value	3x230/400 V 50/60 Hz
---------------	----------------------

CURRENT

Starting current I_{st}	0.04 A
Minimum current I_{min}	0.3 A
Transitional current I_{tr}	1 A
Nominal current I_n	10 A
Maximum current I_{max}	100 A

ACCURACY

Active energy class B in compliance with	EN 50470-3
Reactive energy class 2 in compliance with	EN 62053-23

COMMUNICATION for RS485 MODBUS model

Isolated port	RS485
Unit load	1/2
Protocol	MODBUS RTU
Communication speed	24/48/96/192/384 kbps

COMMUNICATION for M-BUS model

Isolated port	M-BUS
Unit load	1
Protocol	M-BUS
Communication speed	600/1.2k/2.4k/4.8k/9.6k bps

S0 OUTPUTS

Passives optoisolated in compliance with	IEC 62053-31
Type	S01 programmable S02 fixed to 400 imp/kWh
Pulse rate selectable only for S01	001/01/1/10/100 En/imp

TARIFF MANAGEMENT

Through digital input (DIG)	2
Through serial command (COM)	4

SAFETY

In compliance with	IEC 62052-11, IEC 62052-31
Pollution degree	2
Protective class	II
Pulse voltage withstand	6 kV-1.2 μ s
AC voltage withstand	4 kV for 1 min
Housing material flame resistance	UL 94 class V0

ENVIRONMENTAL CONDITIONS

Mechanical environmental	M1
Electromagnetic environmental	E2
Operating temperature	-40°C ... +70°C
Storage temperature	-40°C ... +75°C
Humidity (without condensation)	max 95%
Protection degree of frontal panel / terminals	IP51 / IP20

ORDER CODE	MODEL	NOMINAL VOLTAGE AND FREQUENCY	POWER SUPPLY	CURRENT INPUT	COM PORT	TARIFFS	SO OUTPUTS
1121.0001.0001	UEM100-A R	3x230/400V 50/60Hz	Self-powered	Direct, up to 100A	RS485	4	2
1121.0002.0001	UEM100-A M	3x230/400V 50/60Hz	Self-powered	Direct, up to 100A	M-BUS	4	2
