

BETA 7640GG

Stretch work trousers,
multipocket style, made from
graphene

Certifications and Standards

EN ISO 13688:2013

Features

The Beta line in graphene combines temperature-regulating properties with a modern design for clothing that makes you feel and look your best.

GRAPHENE TECHNOLOGY

Graphene in fabrics optimises thermal comfort: it absorbs excess heat and releases it when it gets cold, maintaining an ideal temperature. It is light, durable, and improves garment comfort.

MODERN DESIGN

The Beta work trousers in graphene are thought out in detail: modern design and tailor-made customisation converge to offer comfort and distinctive style in every work situation.

SMART TECHNOLOGY

Graphene is an intelligent material that efficiently absorbs, retains and dissipates heat, ensuring maximum thermal comfort.

REINFORCED INSERTS

Reinforced inserts are positioned in the parts of the trousers most subject to wear to make them even more resistant and durable.

MULTITASKS

Numerous pockets in different sizes ensure that the items needed for work are always at hand.

Certifications and Standards

CE EN ISO 13688:2013

Size

IT 46 - 58
UK XS - 3XL
