

Keystone Module RJ45 jack Cat.6A STP with PoE LED

Description

This module by Delock can be used to connect twisted pair cable to an RJ45 jack. With its standardised dimensions it can be used for easy snap-in mounting in e.g. a Keystone patch panel, face plate or surface-mount box.

PoE detection and identification

The RJ45 module with PoE indicator is the ideal solution for professional network environments, where fast and reliable detection of Power-over-Ethernet (PoE) is required. The integrated LEDs indicate the presence and type of PoE power supply.

Cable tie-free

On the back of the module there is a locking clip with which the network cable can be fixed and fastened without cable ties.
