**WARNING**

**PERSONAL INJURY**

DO NOT USE these products as safety or emergency stop devices, or in any other application where failure of the product could result in personal injury. Failure to comply with these instructions could result in death or serious injury.

**GENERAL INFORMATION**

24PC Series pressure sensors are four active element piezoresistive bridges. When pressure is applied, the resistance changes and the 24PC provides an output signal proportional to the input pressure.

*Gage* pressure is measured with respect to ambient pressure. When applied pressure increases, the differential voltage $V2 - V4$ increases. As pressure decreases, differential voltage $V2 - V4$ decreases.

*Differential* sensors provide a differential voltage proportional to the pressure differential between port P2 and P1. As $DP = P2 - P1$ increases, differential voltage $V2 - V4$ increases. As $DP = P2 - P1$ decreases, differential voltage $V2 - V4$ decreases.

*Absolute* sensors measure pressure with respect to a vacuum reference. As absolute pressure increases, the differential voltage $V2 - V4$ goes more negative.

**SOLDERING**

Limit soldering to 315 °C [600 °F] maximum, with duration of 10 seconds maximum.

**CLEANING**

Proper cleaning fluids should be selected, based on the type of contaminants to be removed. Honeywell recommends alcohols or fluorinated solvents. Do not immerse the sensor.

**24PC CIRCUIT TERMINATION**

Pin 1 = $Vs (+)$

Pin 2 = Output + ($V2$)

Pin 1 is notched

Pin 2 is next to Pin 1, etc.

**CONSTANT CURRENT EXCITATION SCHEMATIC**

Noncompensated pressure sensors, excited by constant current instead of voltage, exhibit temperature compensation of span.

Constant current excitation has an additional benefit of temperature measurement. When driven by a constant current source, a silicon pressure sensor’s terminal voltage will rise with increased temperature. The rise in voltage not only compensates for the span, but is also an indication of sensor temperature.

GAGE SENSORS

1 x 4 Termination (Style 6) Port Style A, Straight
Pin 1 is notched, Pin 2 is next to Pin 1, etc.

2 x 2 Termination (Style 2) Port Style A, Straight
Pin 1 is notched, Pin 1 is shown at lower right corner. Pins 2, 3, 4 are clockwise.
WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Contact your local sales office for warranty information. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace without charge those items it finds defective. The foregoing is Buyer’s sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

For application assistance, current specifications, or name of the nearest Authorized Distributor, contact a nearby sales office. Or call:
