

XTAR Ultra3500D AA Lithium 3500mAh Battery

The XTAR Ultra3500D is a high-performance, non-rechargeable AA lithium battery designed for demanding applications. With a powerful 3500mAh capacity and stable 1.5V output, it's built to handle high-drain devices and extreme conditions.

Key Features:

- High Capacity: 3500mAh (1.5V) - provides long-lasting power.
- Wide Temperature Range: Operates from -40°C to +60°C.
- Long Shelf Life: Up to 10 years of storage capability.
- Stable Output Voltage: Maintains 1.5V consistently under load.
- Environmental Safety: Free from mercury, cadmium, and lead.
- Multiple Protections: Anti-leak, short-circuit protection, and explosion-proof valve. Technical

Specifications:

Capacity: 3500mAh

Voltage: 1.5V Operating

Temperature: -40°C to +60°C

Storage Temperature: -20°C to +40°C (Optimal: +25°C)

Shelf Life: 10 years Dimensions: Ø14mm × 49.85mm

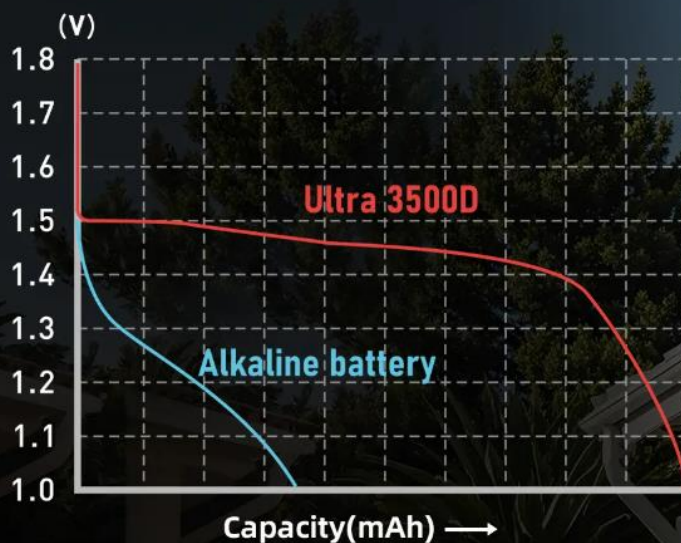

Weight: Approx. 15g Max Discharge Current: 2.5A

Certifications: CE, UKCA, FCC

Applications: Perfect for high-drain devices such as Blink cameras, smart locks, weather sensors, outdoor equipment, and tactical flashlights.

3500mAh High Capacity for More Than 28 Months of Monitoring

Delivers a steady 1.5V output with higher energy density than alkaline batteries, keeping your security system running for over two years without a hitch. So you're on a ladder less often.

Up To 10 Years Shelf Life

You can store them for years without worrying about performance loss, ensuring they deliver reliable power whenever you need them.

Ultra-Low Self-Discharge

30% Lighter Than Alkaline Batteries

Much lighter, much more fit for wearable devices.
