Compatible with phones with width:	55 – 113 mm

The CH-04 car phone holder is a functional and reliable solution for those who value comfort and safety while driving. Equipped with a strong suction cup and locking mechanism, it ensures stable attachment to the windshield or dashboard – even in demanding road conditions. The adjustable arm and full rotation capability allow for precise positioning of your phone, providing easy access to navigation or other essential apps. The intuitive clamp mechanism enables quick one-handed phone placement, while the silicone padding protects your device from damage. CH-04 is a practical companion for every journey.
