

New flexible problem solvers for workshop and assembly.

10-piece MicroSpeeder set in foldable plastic holder. 8 - 19mm.

With ratchet mechanism and reverse lever on the ring end for clockwise and anticlockwise rotation. No swapping over: a real time saver. Ideally suited for working on flat surfaces due to its 15° offset ring side.

Practical foldable holder offering a clearly marked place for storage of each spanner. The ideal companion for construction site work, also providing holes for wall-mounting in the workshop. With clearly readable sizes. Organised forever. One each in extra long design, sizes 8 - 10 - 11 - 12 - 13 - 14 - 16 - 17 - 18 and 19mm.
